Fundamentals of Computer McQs

By

Muhammad Rehan

What is the primary function of a computer?

a) Data input   **B)** Data processing   c) Data output

d) Data storage

Which type of computer is typically used by large organizations for critical applications?

a) Microcomputers   b) Supercomputers

C) Mainframe computers   d) Servers

Which of the following is not an input device?

a) Scanner   b) Keyboard   **C)** Printer   d) Mouse

What is the purpose of a CD-ROM drive?

a) To read and write data onto CDs

B) To read data from CDs only

c) To write data onto CDs only   d) To play music CDs

Which one is output device of a computer?

A) Printer   b) Monitor   c) Keyboard   d) Mouse

What is the purpose of speakers in a computer system?

a) To input sound   b) To input text   **C)** To output sound

d) To output text

Which type of printer produces output by spraying ink onto paper?

a) Laser printer   b) Dot matrix printer   **C)** Inkjet printer

d) Thermal printer

What's the purpose of a server in a computer network.

a) A server is used to process data and perform calculations for individual users.

B) A server is a specialized computer that manages network resources and provides services to other computers on the network.

c) A server is a type of mainframe computer used for personal tasks and entertainment.

d) A server is a type of microcomputer designed for use in small organizations.

What is the significance of email in communication, facilitated by computers?

a) It allows for real-time video conferencing between users

b) It enables the transmission of physical mail through electronic means

C) It provides a platform for sharing text-based messages and reports

d) It allows for the delivery of postal mail through computer networks

How computers transformed the field of publishing?

a) They have eliminated the need for printed books and newspapers

B) They have made it possible for individuals to publish their own work using desktop publishing software

c) They have increased the cost of printing and distributing publications

d) They have restricted access to published materials to a select few individuals

What is the purpose of an operating system in a computer?

A) To manage hardware components and peripherals

b) To create and edit documents and spreadsheets

c) To produce high-quality graphics and visual effects

d) To provide access to the internet and online services

What is the primary function of Disk Operating Systems (DOS)?

A) To manage and allocate system resources efficiently

b) To provide a graphical user interface for computer users

c) To enhance the performance of gaming and multimedia applications

d) To develop software programs and applications

What does a modem facilitate?

A) Digital-to-analog conversion   b) Analog-to-digital conversion

c) Wireless communication   d) Optical data transfer

What is the main function of a modem in a Point of Sale (PoS) system?

A) Processing credit card payments   b) Managing inventory

c) Tracking customer preferences   d) Generating sales reports

What is emphasized about Windows 7's user interface?

a) Complexity   **B)** Simplification   c) Customization

d) Animation

What is an example of a Machine to Machine (M2M) application?

a) Video conferencing   b) Online gaming

C) Medical device data transfer   d) Social media interaction

Which type of programming language is classified as a low-level language?

a) Java   b) Python   **C)** Machine language   d) C++

What is a key feature of Windows 7 for business users?

a) Gaming optimization   b) Multimedia editing tools

C) High-speed performance   d) Personalization options

Which type of network connects multiple LANs over a large geographic area?

a) LAN   b) MAN   **C)** WAN   d) WLAN

Which network type is characterized by data transfer speeds of up to 1 Gbps?

A) LAN   b) MAN   c) WAN   d) WLAN

What is the purpose of the "Add Hardware" tool in PC Tools?

a) Troubleshoot hardware issues

b) Remove existing hardware

C) Install new hardware

d) Manage hardware settings

Which Norton Utilities tool helps in detecting and removing invalid registry entries?

A) Performance   b) Privacy   c) Recovery   d) Optimization

What type of software transforms numeric information into graphical representations?

A) Graphics   b) Database   c) Spreadsheet

d) Word processor

Which database program is mentioned below?

a) Microsoft Word   b) Microsoft Excel   **C)** Microsoft Access

d) Microsoft PowerPoint

What is the primary function of database software?

a) Creating graphical representations

B) Managing large amounts of data

c) Designing newsletters   d) Writing reports

What is the main purpose of networking tools such as LAN and WAN?

a) Enhancing computer performance

b) Improving data security

C) Facilitating communication and resource sharing

d) Managing hardware components

What is the function of spreadsheet software?

a) Creating graphical representations

B) Performing calculations and mathematical tasks

c) Managing large amounts of data

d) Producing textual material

Which software is commonly used for word processing tasks?

a) Microsoft Excel   b) Microsoft Access   **C)** Microsoft Word

d) Microsoft PowerPoint

What are some common features found in most spreadsheet packages?

a) Drawing tools and image editing

B) Formatting numbers and aligning labels

c) Importing and exporting data

d) Page formatting and spell check

How does a spreadsheet automatically update calculation results?

a) By refreshing the data periodically

b) By automatically saving the document

c) By manually inputting the updated values

D) By recalculating when changes are made to the data

How does the word processor handle text when the margin is reached?

a) It automatically creates a new page

b) It truncates the text

c) It adjusts the text to fit on the same line

D) It moves to the next line

Which of the following is NOT included in good record-keeping practices?

a) Using precise language and understandable terminology

B) Recording irrelevant conversations with friends or family

c) Signing and dating each entry with staff's name and professional designation

d) Avoiding unnecessary gaps in the records

What are some advantages of computer-based patient records?

a) Limited access to patient data   **B)** Easy sharing of patient data globally

c) Higher risk of data loss

d) Inability to analyze patient records for presentations or journals

What is the primary purpose of data analysis in healthcare management?

a) To increase healthcare budgets

b) To decrease the efficiency of care processes

C) To improve both processes and patient care outcomes

d) To reduce the accessibility of patient information

How can computer-based patient records contribute to clinical research?

a) By limiting access to patient data

b) By reducing the efficiency of care processes

C) By allowing easy sharing of patient data for research studies

d) By increasing redundant examinations

What does data analysis for hospital management primarily focus on?

a) Increasing redundant examinations

b) Decreasing the efficiency of care processes

C) Providing statistical insights about quality of care, costs, and performance

d) Limiting access to patient data

What aspect of patient care does data analysis primarily aim to improve?

a) Increasing redundant examinations

B) Decreasing the length of stays in ICU

c) Decreasing quality of care

d) Reducing the accessibility of patient information

What is the primary function of the Centricity Critical Care system in data analysis?

a) To limit access to patient data

b) To reduce efficiency in healthcare processes

C) To provide statistical insights about quality of care and costs

d) To increase redundant examinations

How can data analysis contribute to total quality improvement in healthcare?

a) By increasing redundant examinations

b) By decreasing the efficiency of care processes

C) By providing factual analysis of patient care aspects

d) By limiting access to patient information

Which of the following is NOT an advantage of computer-based patient records?

a) Ability to maintain patient records with details

b) Easy sharing of patient data globally

C) Inability to analyze patient records for presentations or journals

d) Ability to categorize patients based on diagnosis or treatment

What does RAM stand for in the context of computer memory?

a) Random Access Method   b) Read-Only Memory

C) Random Access Memory   d) Rapid Action Module

Which component of a computer system is responsible for controlling the flow of data between the CPU and other devices within computer?

a) Motherboard   b) Hard disk drive (HDD)

c) Graphics card   **D)** Bus interface

What is the function of a mouse in computer interaction?

a) To input text and commands

b) To display output on the screen

C) To control the movement of the cursor and select items

d) To store data for future retrieval

Which of the following is NOT a type of computer virus?

a) Trojan horse   b) Worm   c) Spyware   **D)** Firewall

What does the term "URL" stand for in computer terminology?

A) Uniform Resource Locator   b) User Required Link

c) Universal Response Language   d) Unique Resource List

What is the purpose of an IP address in computer networking?

a) To identify a specific web page on the Internet

b) To encrypt data transmitted over the network

C) To uniquely identify a device connected to a network

d) To filter spam emails from reaching the inbox

Which of the following software packages is primarily used for system optimization and management tasks?

a) PC Tools   **B)** Norton Utilities   c) Graphics   d) Data Base
